

Color	Levels of Concern	Index	Description of Air Quality
Green	Good	0 to 50	Air quality is satisfactory, and air pollution poses little or no risk.
Yellow	Moderate	51 to 100	Air quality is acceptable. However, there may be a risk for some people, particularly those who are unusually sensitive to air pollution.
Orange	Unhealthy for Sensitive Groups	101 to 150	Members of sensitive groups may experience health effects. The general public is less likely to be affected.
Red	Unhealthy	151 to 200	Some members of the general public may experience health effects; members of sensitive groups may experience more serious health effects.
Purple	Very Unhealthy	201 to 300	Health alert: The risk of health effects is increased for everyone.

# FIRE ADAPTED NM SPRING WEBINAR OPPORTUNITY!

Join us as we prepare for fire season 2023

**Thursday, 16 March 2023**  
**2:00pm MT**

**The Skinny on Smoke:  
Outlooks, Education and Awareness**

**Where there is fire there is smoke, and where there is smoke there are potential impacts on air quality!**

**How do we know when, where, and for how long our communities are likely to be exposed?**

Please join us for a one-hour webinar with US Forest Service Air Quality Specialist Kerry Jones to learn about the operational side of smoke forecasting, followed by a facilitated Q&A where attendees may pose their questions to the presenter.

Learn more, save the date, and join the network by visiting [www.facnm.org](http://www.facnm.org)

**Attend the webinar via Zoom or tune in on the FACNM Facebook Live page**

For updated event information and to save the date, visit:
